Important

Information for approval of professional development can be found on pages of your CPDP Guidelines booklet. In addition, please note that credit may only be evaluated as acceptable if the professional development was completed after the IPDP approval date AND the completed professional development correlates with the IPDP. These are state standards by which the committee must abide. Please review your IPDP before selecting professional development. “Questionable” professional development should be submitted to the committee for acceptance. An amendment may be necessary if seeking license in a different area other than the current IPDP.
